PREPARING FOR EVALUATING MEDICAL EDUCATION TEACHING (PEME)

INTRODUCTORY INFORMATION

Actively seeking constructive feedback on teaching events and programmes is an essential skill in developing as a medical educator. This highly participatory one day course introduces participants to some essential principles of evaluation and considers how these translate into straightforward practical techniques in medical education. Participants will critique a range of evaluation tools and then to devise both an evaluation strategy and suitable tools for their own teaching. Some participants may find it beneficial to complete the Preparing for Supervising and Teaching (PSTME) course first, however this is not a requirement.

Who should participate in the course?

Interested medical or clinical educators who would like to use constructive evaluation techniques to improve their teaching.

What will participants gain from participating in the course?

By the end of the day participants will

- have increased knowledge of principles of evaluating learning events and programmes
- have critiqued a range of evaluation tools, identifying their pros and cons and suitability for their own context
- have identified those aspects of their own teaching which would benefit most from feedback from learners and other stakeholders
- be able to devise an evaluation strategy for a programme and also specific tools to undertake an effective evaluation.

Each participant will select a teaching event or programme which they wish to focus on and will be supported in applying the principles and techniques from the day to developing an evaluation strategy and tools.

Participants will receive a certificate of attendance at the end of day. Some participants may choose to submit, within six months, a short report or a publication draft (up to 3000 words) including their evaluation strategy, tools and the outcomes of carrying out their evaluation. Mentoring is available to support this additional activity and completion will lead to award of the certificate of completion of PEME.

Additional information and application confirmation is available via:

For general information on the course please contact the OxCMEd educational officer Dr Katy Newell-Jones via: info@oxcme.uk and visit the OxCMEd website at: www.oxcme.uk

Course Fee:

- Individual registration: £200
- Group registration (6-12 students): £1,000
- Group registration (13-18 students): £1,500
- Group registration (19-25 students): £2,000
- More than 25 students to be negotiated
